

Brick Techniques: STEM Basics with LEGO®

Join Brick Tech as we introduce your child to STEM basics by building guided projects out of LEGO® pieces! Each LEGO® project will showcase relevant STEM concepts, such as a motorized helicopter to discuss gear drives or a skyscraper with bricks to introduce overlapping construction, fostering hands-on learning for participants. One project will be introduced each day of class and students will have the remaining time to build, discover, and learn with additional LEGO® pieces. Come explore the basics of STEM this fall with Brick Tech! There are no prerequisites for this class. Projects for winter will be different than Fall session

**Fridays,
January 7th - May 13**

Omit: Jan. 28, Feb. 25, Mar. 11, April 1

3:30pm-4:45pm

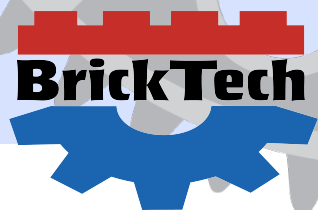

Grades: K-2nd

Registration Fee: \$420
